4HD provided Phase III for Maintenance Construction Engineering Services for the IDOT Bureau of Maintenance as a sub to Primera Engineers PTB 188. The goal of the project is to provide the department with assistance on various expressway and arterial roadside maintenance projects, repair construction projects and safety study projects during the construction time. Typical work assignments include but are not limited to general roadway and roadside maintenance, repair construction inspection, documentation, and safety analysis. Various work activities consist of but are not limited to monitoring and adjusting work zone traffic control and site protection for quality control and monitoring and adjusting contractor work crew field activities for quality control. Various maintenance projects consist of but are not limited to roadway sweeping, guardrail repair, pedestrian barrier/fence repair, cable road guard repair, surveying for existing damage, marking up existing damage, preparation of work orders, preparing and submitting any required documentation, prescribing steps to provide acceptable levels of safety, assuring disciplined safety guidelines, and providing general assistance as a member of a field crew.
